

## Conformance codes

Codes to be printed on the rear of the Conformance Certificates.

Class 1 Pass in all requirements of the Specification

Class 2 Pass in all the requirements except ~

Class 3 Fire Service use except ~

Class 4 Police Force use except ~

Class 5 Covert vehicle use except ~

- A The unit tested, radiated narrow band emissions which were found to be in the receive frequency band of the on-board receiver(s) and may cause interference on an allocated radio channel.
- B The unit tested, radiated broadband noise. The radiating levels exceed the requirements of the specification, but may be acceptable in operational conditions.
- C The unit tested, requires modification to non-essential electronic equipment.
- D The unit tested, demonstrated excessive Alternator output ripple voltage. A modification would be required.
- E The unit tested, was found to be susceptible, however it should not affect operational requirements.
- # The vehicle tested, does interfere with covert earpieces (*see notes below*) ~

*Notes ~ This test is subjective and has been graded in three levels (\*)*

- a - low noise.*
- b - noise present, but may be tolerable.*
- c - intrusive noise.*

(\*) It is advisable that the officer should take the earpiece with them and while sitting in the vehicle, make their own evaluation, with the ignition off and on.

Further information can be obtained from the Project Officer on 01993 844853.
